7,107 islands…what’s yours? There is something about 7,107 islands strewn in the sunny far-east portion of this earth, and not in some chilly polar, making the Philippines a virtual tropical paradise. There is no imagining if we had turned to be one mass of a monotonous ‘Greenland’. Loving instead that we have more land edges and rambling shores, more waters to wade and frolic about. The highway travels seemingly shorter; the scent of the first stop lingers still long after the retreat is over. The scattered-about attribute of my Philippines is charming, fascinating. ISLAKO.com is a tribute to that forever fascination. We are thrilled about soaking up the stuff ‘Islands’ are made of. 7,107 islands…365 days. We have every excuse to have fun! “Isla Ko”... “My Island” So, what about your island?
